Dear Ujjwal Singh,

We are pleased to provide you with the following assignments. Your completion of these tasks and the subsequent sharing of your results are vital to your progress in our program.

Tasks

1. Track user location: the feature should be under profile once we click on Obtain location we should show the user's geographical location in the format of (City,State, country)and display it on the UI using the Google Maps API we should show along with weather conditon on the map .

2. Create a feature to upload the question in video format in the ask question where students can upload the video. We should authenticate with OTP through email before uploading video . the video length should not be more than 2 mins and 50mb . if its more than that we should not allow users to post. user can upload videos on 2pm to 7pm only apart from that time range user cannot upload an video

3. Forgot password option: Create a page and route to reset the password using email or phone number. user can request forgot password only 1 time a day if they do twice we should show warning message like use only time, we should have feature called password generator where we will generate random password . the random password should not have any special character and numbers and it should be combination of Small and upper case.

4. Track user login information: Determine the system/computer(type of browser, OS and system desktop or mobile of laptop) and IP address from which the user is logging in, and store it in the database and also show it as login history to the user. if the user log into google chrome they should be able to access the website using OTP which we will trigger from email , if the user login from microsoft browser we should allow user without any authentication . if the device is mobile we should be able to access the website only during 10 AM to 1 PM apart from that time

5. Introduce reward system - Implement a reward system to incentivize user contributions. Assign points or badges to users based on their contributions and achievements. If user answer one question he will be rewarded with 5 points as well as if the answer recevie 5 upvotes we need to add another 5 points to user. we should be able to see the points under profile user can transer points to other user by searching user profile as well as how many ponints we are transferring if we click tranfer button we can assing some points to other users. user can transefer points to other people only if they have more than 10 points if they have below 10 poitns user cannot transfer the points. if we remove the answer the point should be reduced as well as if we downtime the point should be reduced.

Instructions:

- 1) All task should be implemented on the training project as extra features.
- 2) You need to share the netlify/vercel URL of the hosted website.
- 3) Make the entire website responsive on all mobile devices including tablets
- 4) Mentor support will not be available during the assignment.

Internship tasks are assigned to work individually, kindly research and take help from web for reference instead

of revealing tasks and getting helps.

5) Students can send their query over email training@nullclass.com if they struck somewhere or if they have confusion during internship task

Key Terms:

1. To be eligible for a stipend of 3k and LOR, Experience letter and an internship certificate, it is imperative that you successfully complete these assignments with proper implementation and execution on all tasks 100% within a 15-06-2025 to 15-08-2025 (2 Months) timeframe

Failing to complete all the tasks accordingly to the requirements While completing minimum 80% of the Internship tasks and final submission successfully accordingly to the instructions & Requirements the stipend will be performance based in between ₹300-₹600

You can avail internship certificate only on the completion/trying one single task assigned

2. Alongside running code file(source code), you are required to submit an internship report. The report should be concise and cover the following sections: Introduction, Background, Learning Objectives, Activities and Tasks Skills and Competencies, Feedback and Evidence, Challenges and Solutions, Outcomes and Impact, and Conclusion.

4. Ensure consistent completion of the daily report form (<https://dailyreport.nullclass.com/>) without exception. While occasional absences are acceptable, it is essential to indicate days when no work was performed.

5. Any instance of plagiarism, where content is copied from external sources, will result in immediate disqualification from both the stipend and the certificate, leading to the termination of your participation in the program.

6. Please note that these assignments should be integrated within the framework of the course curriculum's completed applications, rather than being treated as separate task otherwise your all task will be disqualified.

7. Mentor support will not be available during the assignment as the purpose of internship tasks is to make the individuals to work on with their individual skills and especially to research and work to gain their skillset

We eagerly anticipate witnessing the knowledge and accomplishments you will gain during this internship.

Internship tasks are assigned to work individually, kindly research and take help from web for reference instead of revealing tasks and getting Failing to adhere may lead to termination.

8. Within the allotted duration the tasks has to be submitted for evaluation, failing to it you may avail internship certificate only .Once the tasks been completed and submitted for evaluation there will be no more resubmissions /retries available henceforth, As well as it would be considered as the commencement of your internship.

Please Find the Attached Offer Letter Along this task Mail.!

Best regards,

NULLCLASS
